The Tree Dispensary-Christina Stapley 2021-04-19 The Tree Dispensary explores the history, folklore and medicinal uses of native European trees, beautifully illustrated with the author's own photographs. The book presents a thorough and deep appreciation of trees as the author has experienced them through everyday life, as a herb historian and practicing herbalist. Categorised into seasons, each of the 30 tree chapters covers cultivation, cookery, foraging, crafts, history, botany, medicinal use and mythology. Original herbs are used as source material for the historical section, allowing voices from the past to speak for themselves. A 'Herbalists Reference' for each tree includes medicinal uses, dosage and constituents and reflects the author's own extensive experience of using these wonderful tree remedies. "For years as a herbalist I had been walking about looking down for what was growing around my feet. The emphasis changed to looking up and I was delighted by the exquisite detail of tiny female flowers on trees, which I simply could not believe I had missed before. I took photographs, pressed herbarium samples, harvested and studied..."

Arabian Drugs in Medieval Mediterranean Medicine-Zohar Amar 2016-12-05 Explores the impact of drugs introduced by the Arabs on medieval Mediterranean medicine. For more than one thousand years Arab medicine held sway in the ancient world, from the shores of Spain in the West, China and Sri Lanka (Ceylon) in the East. This book explores the impact of Greek (as well as Indian and Persian) medical heritage on the evolution of Arab medicine and pharmacology, investigating it from the perspective of materia medica a reliable indication of the contribution of this medical legacy. Focusing on the main substances introduced and traded by the Arabs in the medieval Mediterranean including Ambergris, camphor, musk, myrobalan, nutmeg, sandalwood and turmeric the authors show how they enriched the existing inventory of drugs influenced by Galenic-Arab pharmacology. Further, they look at how these substances merged with the development and distribution of new technologies and industries that evolved in the Middle Ages such as textiles, paper, dyeing and tanning, and with the new trends, demands and fashions regarding spices, perfumes, ornaments (gemstones) and foodstuffs some of which can be found in our modern-day food basket.

Practical Materia Medica of the Medieval Eastern Mediterranean According to the Cairo Genizah-Efrayim Lev 2008 The authors provide a new insight to the practice of medical care in the medieval world. What Witches Do-Stewart Farrar 2012-06-01 An eyewitness account of a modern coven and an overview of Wiccan history in a book that "sweep[s] clean the 'old image of witchcraft'" (Kirkus Reviews). What do witches really do? What is it like to be a witch? Experience the process through the eyes of Stewart Farrar, author, journalist, and witch, as he describes in detail the activities and practices of modern-day witches. When Stewart first started writing What Witches Do, he was "an interested agnostic" writing from an objective viewpoint. But by the time the book was finished, he had been initiated into the mysteries of Wicca and was destined to become internationally known as one of the world's leading writers on the subject. What Witches Do is part of The Paranormal, a series that resurrects rare titles, classic publications, and out-of-print texts, as well as publishes new supernatural and otherworldly ebooks for the digital age. The series includes a range of paranormal subjects from angels, fairies, and UFOs to near-death experiences, vampires, ghosts, and witchcraft.

Midwifery and the Medicalization of Childbirth-Edwin R. Van Teijlingen 2004 This book provides an introduction to the sociological study of midwifery. The readings have been selected to highlight the interplay between midwifery and medicine, reflecting the medicalization of childbirth. It highlights the major themes in both a historical and a current context, as well as western and non-western societies. Two major themes underlie the organization of this book: that the conception of midwifery must be broadened to encompass a sociological perspective; and that the ongoing trend toward the medicalization of midwifery is crucial to an understanding of the historical, current, and future status of midwifery.

Tumeric-Penelope Ody 2018-09-01 Turmeric is a traditional herbal remedy that has been used for centuries and in recent years has been hailed as a "miracle cure" for a range of illnesses from arthritis to auto-immune disease. Penelope Ody, one of Britain’s leading herbalists, draws on the extensive scientific studies that have appeared on curcuminoids (one of the many chemical constituents of turmeric) in one of the most authoritative book on turmeric currently available. In Turmeric Penelope Ody provides a history of turmeric and its therapeutic role. From its cultivation to its traditional use in Chinese and Ayurvedic medicine to its centrality to the Asian diet (including some recipes, since many will be familiar with turmeric as a culinary spice). Turmeric has been used...
medically in South Asia for more than 4,000 years; today its antioxidant and anti-inflammatory properties are well established and may be helpful for a host of illnesses, from arthritis and diabetes to Alzheimer’s and heart disease. Penelope Ody investigates this ancient remedy’s suitability for twenty-first century ailments separating the hysteria about its benefits from a realistic evaluation into how it can help to improve any reader's health.

Hatfield’s Herbal - Gabrielle Hatfield 2009-03-05 Hatfield’s Herbal is the story of how people all over Britain have used its wild plants throughout history, for reasons magical, mystical and medicinal. Gabrielle Hatfield has drawn on a lifetime’s knowledge to describe the properties of over 150 native plants, and the customs that surround them: from predicting the weather with seaweed to using deadly nightshade to make ladies’ pupils dilate appealingly, and from ensuring a husband’s faithfulness with butterbur to warding off witches by planting a rowan tree. Filled with stories, folklore and remedies both strange and practical, this is a memorable and eye-dilating guide to the richness of Britain’s heritage.

Meditical Plants - Pravin Chandra Trivedi 2009 The Quest For Good Health And Immortality Has Been A Continuous Human Endeavour Since The Beginning Of Civilisation Throughout The World. Plants have been used as a source of medicine by men from ancient times. Initially, these formed the bulk of folk or ethnomedicine, practised in India and some other parts of the world. Later, a considerable part of this indigenous knowledge was formulated, documented and eventually passed into the organised systems of medicine, such as Ayurveda, Unani, Siddha or some other systems outside India. Subsequently, with the advance in techniques of phytochemistry and pharmacology, a number of active principles of medicinal plants were isolated and introduced as valuable drugs in modern medicine. The second revised and enlarged edition of this book, medicinal plants: utilisation and conservation, contains 24 chapters covering holistic information on medicinal plants. Four new chapters added includes articles on medicinal plant solutions to asthmatic disease mechanism of plants. Book contains articles on cultivation and propagation of medicinal plants, medicinal plant diseases of medicinal & aromatic plants, herbal based contraceptive research, plants with antioxidative properties in radio-protection, IPR, and growth and competitiveness of Indian pharmaceutical industries. Second revised & enlarged edition of this book updates the first edition besides adding four new chapters. Book will be useful to practicioners of medicines, farmers, researchers in botany, pharmacologists and students.
